

Octavian Andrei Pop

Cloud Engineer | Backend Developer | DevOps Specialist

Cluj-Napoca | poctavianandrei@gmail.com | www.linkedin.com/in/octavian-andrei-pop-820871221 | <https://github.com/ndrpp>

PROFESSIONAL SUMMARY

Experienced Cloud/Backend Engineer with 3 years building scalable distributed systems and cloud infrastructure. Proven expertise in AWS, microservices architecture, and CI/CD pipelines. Reduced infrastructure costs by 22% and improved system reliability to 99.9% uptime. Seeking to leverage cloud-native and backend development skills in a challenging role.

TECHNICAL SKILLS

Cloud Platforms: AWS

Backend Technologies: Node.js, Go, REST APIs, WebSockets

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Aurora

Infrastructure as Code: Terraform, CloudFormation, Ansible, AWS CDK, Serverless Framework

Containerization & Orchestration: Docker, Docker Compose, ECS

CI/CD & DevOps: GitLab CI, GitHub Actions, SonarQube

Monitoring & Logging: Grafana, ELK Stack, CloudWatch, X-Ray

Message Queues: AWS SQS/SNS

Additional: Microservices, Serverless, API Gateway, Linux, Bash, Git

PROFESSIONAL EXPERIENCE

Software Engineer | Hypermedia

Apr 2022 - Present | Cluj-Napoca

Refuelling & EV Charging Sites Management Platform (Apr 2023 - Present)

- Architected and implemented cloud-native solutions serving multiple business users with 99.95% uptime
- Reduced cloud infrastructure costs by 22% through optimization of RDS proxy pools and Lambda warmup
- Optimized Gitlab CI jobs and dependencies, reducing deployment duration by 50%-75% for multiple services

- Implemented Infrastructure as Code using Terraform, CDK and CloudFormation, managing thousands of AWS resources across 3 environments
- Led migration of multiple services from Serverless Framework to AWS CDK, saving infrastructure costs
- Mentored team of 2 junior engineers on cloud best practices and DevOps methodologies
- Technologies: AWS, Lambda, CDK, Node.js, RDS, Gitlab CI

Car Fleet Management Platform Backend (Nov 2024 - Present)

- Designed and implemented RESTful APIs with Node.js and Fastify, leading a team of 4 backend developers
- Implemented Apple & Google Payments
- Implemented event-driven architecture using RabbitMQ and Go for receipt generation
- Technologies: Node.js, PostgreSQL, Go, RabbitMQ

E-Mobility Services Platform Backend (Apr 2022 - Nov 2024)

- Built WebSocket server handling 2K concurrent EV-chargers connections for real-time data streaming
- Developed microservices architecture with Node.js for EV-chargers transactions and configuration management
- Implemented custom protocol TCP listener for tag-based vehicle charging, simplifying start charging flow
- Technologies: AWS, Node.js, WebSockets, DynamoDB, Lambda, CloudWatch

EDUCATION

Bachelor's degree in Telecommunications and Computer Systems Networking

Technical University of Cluj Napoca | 2021

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate
- AWS Certified Developer - Associate

CORE COMPETENCIES

Cloud Architecture | Microservices | Event-driven Architectures | Container Orchestration | Infrastructure as Code | Node.js | Go | CI/CD Pipelines | Performance Optimization | Cost Optimization | Security Best Practices | Agile/Scrum | System Design | High Availability | Scalability | Monitoring | Automation | Database Design | API Development | Distributed Systems | Load Balancing
